Laith Qasem Amro

Full Stack .NET | Angular

laithamroq@gmail.com +962 777 492 113 Laith Q. Amro LaithAmro44

Full Stack .NET Software Engineer experienced in developing and maintaining enterprise and SaaS systems using .NET Core, Angular, ABP Framework, EF Core, and SQL Server. Worked across REST APIs, business logic, databases, integrations, background jobs, production support, multi-tenancy, DDD, and Micro Frontend architecture, with a focus on clean and maintainable code.

WORK EXPERIENCE

Software Engineer || QOAD 09/2025 – Present
Amman, Jordan

Using ASP.NET Core, Angular, ABP Framework, EF Core, and SQL Server to build and maintain multi-tenant SaaS, fleet and mobility systems across frontend, backend, database, and production support.

Full Stack .NET Developer Intern || Epya Solutions 05/2025 – 08/2025
Amman, Jordan

Worked with ASP.NET MVC/Web API, Entity Framework, SQL Server, and Angular to build full-stack applications, gaining practical experience in MVC architecture, REST APIs, database transactions, frontend integration, and third-party API integration.

SKILLS

Full Stack Development
- ASP.NET Core Web API/MVC
- C#
- Angular
- HTML, CSS/SCSS, JS/TS
- Entity Framework Core
- LINQ
- RxJS

Integrations & Databases
- Third-Party API Integration
- Background Jobs
- Message Queues
- Redis
- Logging
- SQL Server (T-SQL)
- Oracle

Tools & Development Process
- Git, GitHub, GitLab
- Azure DevOps
- Agile/Scrum

Architecture & Engineering
- Clean Architecture
- SOLID
- Domain-Driven Design (DDD)
- Microservices
- SaaS Architecture
- Multi-Tenancy
- Micro Frontend
- API Gateway
- RESTful API Design

Testing & Automation
- Unit & Functional Testing
- Debugging
- Root Cause Analysis
- Postman, Selenium

AI-Assisted Development
- Agentic Workflows
- Prompt & Context Engineering
- Code Review, Refactoring & Validation
- Development Automation

PROJECTS

Fleet & Rental Management System | QOAD 09/2025 – Present

- Build and enhance features across frontend, backend, and database layers, including APIs, business logic, validation, permissions, notifications, and background jobs.
- Work with ABP and DDD concepts such as multi-tenancy, aggregates, domain services, domain events, settings, and authorization.
- Resolve production issues involving legacy logic, SQL queries, views, stored procedures, data-fix scripts, and performance bottlenecks.
- Work on external integrations using REST APIs, webhooks, RabbitMQ, and API Gateway routing.

Vehicle Tracking & Fleet Monitoring System | QOAD 11/2025 – 03/2026

- Rebuilt a legacy vehicle tracking frontend as an Angular Micro-Frontend, migrating **+40 pages across 4 modules** without changing existing business behavior.
- Developed map-based features including live tracking, historical trips, route visualization, stops, zones, trip playback, and remote device commands.
- Used reusable components and state management to keep the frontend clean and easier to maintain.
- Reduced module load time from approximately **20 seconds to 1 second (~95% reduction)** by simplifying the frontend structure and reusing shared platform dependencies.

Student Examination Management System | Epya Solutions 05/2025 – 06/2025

- Built an exam system using ASP.NET, Entity Framework, SQL Server, and Angular, covering courses, instructors, students, questions, answers, and exam submissions.
- Developed MVC and REST API functionality using controllers, models, views, DTOs, validation, and database operations.
- Integrated the Angular frontend with backend APIs and implemented a modern UI based on Figma designs.
- Implemented exam rules such as preventing duplicate submissions and added seed data for testing and development.

Hotel Booking & API Integration System | Epya Solutions 07/2025 – 08/2025

- Integrated external hotel-booking APIs to retrieve hotel and booking data.
- Worked with REST API authentication and request configuration using access tokens, API keys, headers, and external API responses.
- Connected hotel data and booking workflows with an Angular and ASP.NET-based application.

Multi-Tenant E-Restaurant Web API | QOAD 10/2025

Built a multi-tenant REST API using ASP.NET Core, EF Core, and SQL Server with Clean Architecture, tenant isolation, localization, auditing, validation, Swagger, and automated tests.

Computer Engineering Academic Resources Portal | BAU - FET 2023 – Present

Built and deployed an Angular academic resources portal with an interactive Computer Engineering study-plan tree, allowing students to access organized materials for each course.

Vendor Portal UI Modernization | QOAD 08/2026 – Present

Genetic Algorithm-Based University Timetabling System | BAU - FET 02/2025 – 09/2025

University Course Registration Automation System | BAU - FET 07/2022 – Present

Student Grade Management System | BAU - FET 02/2024 – 05/2024

University Grade Monitoring & Notification System | BAU - FET 03/2024 – Present

Embedded Water Level Monitoring System | BAU - FET 01/2025 – 02/2025

EDUCATION

Bachelor's degree, Computer Engineering | Al-Balqa Applied University (FET)

GPA: 3.84 / 4.00 **(Excellent)**, **Ranked 1st** in my graduating class.

CERTIFICATES

Mastering ASP.NET Core: Concepts to Production-Ready APIs

Metigator || Issam Abdelnabi

Computer Maintenance Comprehensive Course

Maintenance Team (MT)

Front End Developer

IEEE BAU CS

AWARDS

Shadow Code | IEEE BAU CS 18/05/2025

Won 1st place **(Top Solver)** in Problem Solving at a national-level competition with 30+ university teams across Jordan.

Academic Excellence Recognition | BAU - FET 2025

Received recognition from the Dean of the Faculty for achieving **1st place in Computer Engineering** among the university's graduating class.

Code Conundrum Challenge | ZerOne Team 2023

Won 3rd Place in a college-level programming competition.
